AOIT²
Advanced Open-Source Identity Threat Tradecraft

BLACK HORSE
a **PARSONS** Company

## Course Overview

Developed by Blackhorse, a PARSONS Company, the Advanced Open-Source Identity Threat Tradecraft Course (AOIT²) is an operational approach to utilizing Publicly Available Information (PAI) to gather and disseminate information to address specific mission requirements.

AOIT² applies a detailed cycle within the PAI research process in order to identify Identities Threat that are a direct danger to mission success.

AOIT² helps researchers identify specific counter-measures against threats to a mission based on the capabilities, policies, regulations, and Rules of Engagement established within an Area of Operation.
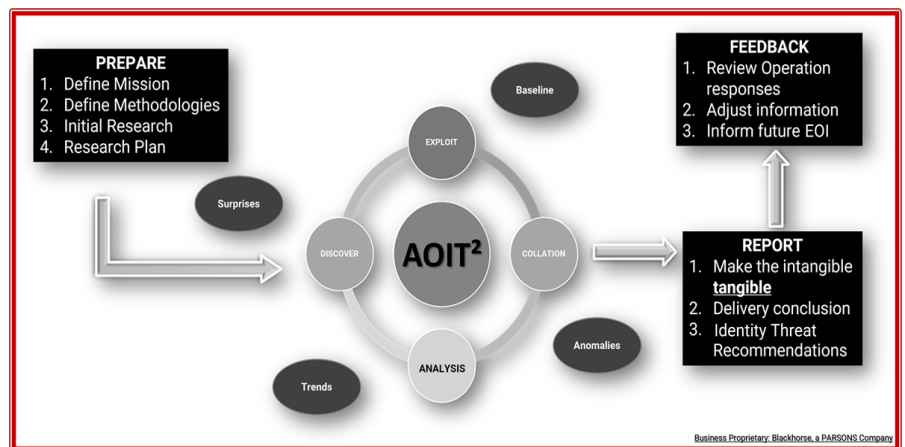

Certification

AOIT² instructors combine real-world experience, hands-on instruction, and curated practical scenarios to ensure students master the content and apply it to multiple course deliverables. Once all requirements are met, students will receive a certificate recognizing them as being highly proficient in the Identity Threat, PAI & Open Source Intelligence (OSINT) research skills and methodology acquired during the course.

What makes AOIT² different from other courses?

- AOIT² is based on a comprehensive scheme approach utilizing PAI and OSINT methodology
- AOIT² can be used to feed, support, and validate OSINT data
- AOIT² is applicable to any supporting or operational PAI environment
- AOIT² supports Linear and Multi-Directional Operational research approaches aiming to enhance relationships between support and operational requirements

AOIT²
APPROACH

Differentiators

- Based on best-in-class curriculum that translates directly to positive mission outcomes
- AOIT² instructors bring a combined 300+ years of targeting experience and real world, lessons-learned scenarios
- Holistic, skills-based, and tool-agnostic training tailored to your needs
- Real-time and relevant data

Mission and Skills Supported

- Targeting & Threat Intelligence
- Information Warfare
- PAI approaches to support Multi-Domain Operations
- OSINT
- Multi Domain Operations (MDO)
- Civil Affairs
- Geopolitical Strategies
- F3EA
- C4
- Force Protection
- HUMINT
- Identity Management
- Information Operations
- Logistics
- Operational Security
- Preparation of the Digital Environment
- Psychological Operations
- Public Affairs
- Commercial Analysis
- Data Breaches
- Fraud Detection
- And more

Skills & Outcomes

- Understanding the capabilities of PAI research in support of the Identity Threat Research Process
- Identify Entities of Interest (EOI) to include tangible and intangible targets
- Comprehension of the AOIT² Framework including:
  - Preparation
  - Discovery
  - Exploitation
  - Collation
  - Analysis
  - Reporting
  - Feedback
- Understanding of the methodologies, assessments and research required to create a Identity Threat Report (ITR)

Delivery

AOIT² is an in-person course offered at one of our state-of-the-art classrooms in Herndon, VA, or Fayetteville, NC.

- Mobile training teams are available to host specially-tailored courses at request

AOIT² is a ten-day course that provides the skills necessary to conduct Identity Threat research in an open-source environment.

A five-day course is available for prior CASO graduates. CASO certification must be earned within a one-year timeline before taking the expedited AOIT² course and show proficiency in open-source research or using these techniques on a daily basis.
